arithmetic intensity (FLOP per byte of compulsory traffic)
memory ceiling used: 147 GiB/s (best counted DRAM-size rate of any pattern, SAXPY)
alternative: triad, counted 122 GiB/s
alternative: triad with one allocate read per written array, 162 GiB/s (unverified)
compute peak 146 GFLOP/s (fmla sweep)
L1 triad bandwidth 253 GiB/s
